Takbuhan St. Paradise 3 Purok 4, Padre Pio Healing Mountain San Jose Del Monte Bulacan | jobmatthewbernardo@gmail.com | +63 9274797949

EDUCATION

Bachelor of Science in Information Technology with Specialization in Mobile and Internet Technologies

A.Y. 2020 – 2024

National University Fairview / Asia Pacific College

- **Bachelor's Degree Holder**
 - **Activities:** Active student, Event Volunteer, Hackathon Participant.
-

SKILLS SUMMARY

Technical Skills: Web Development, Front-End Development, Responsive Web Design, HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap, Node.js, REST APIs, Git, GitHub, UI/UX Implementation, Responsive Design, Cross-Browser Compatibility, API Integration, Web Performance Optimization, Manual Testing, Functional Testing, Git Version Control, Prompt Engineering, Vibe Coding

Soft Skills: Strong design thinking capabilities, Attention to detail, Time management, Communication, Improves based on feedback, Analytical Thinking, Problem-Solving, Curiosity, Accountability.

WORK EXPERIENCE

EXP DIGITAL SOLUTIONS CORPORATION

Developer

Aug 2024 – Present

- Improved application functionality by developing, maintaining, and enhancing features for SaaS and web applications, with focus on usability, performance, and reliable user workflows.
- Supported application development by implementing and updating front-end and back-end components based on project requirements and business needs.
- Resolved application issues by identifying bugs, applying code fixes, and coordinating with the development team through Jira to track and complete technical tasks.
- Improved system functionality by translating requirements into working features, reusable components, and application logic aligned with expected user workflows.
- Assisted in maintaining application quality by testing newly developed features, validating fixes, and ensuring functionality worked correctly before deployment.

BOUNTY FRESH FOOD INC.

Cybersecurity Operations Intern

Jan 2024 – Jun 2024

- Reduced phishing risk by running GoPhish email simulations, tracking employee responses, and supporting awareness training to improve user security behavior.
 - Strengthened endpoint threat visibility by reviewing Trend Vision One alerts, identifying suspicious activities, and helping escalate potential risks for timely action.
 - Improved security monitoring by analyzing FortiSIEM events, including malicious URL blocks, unusual login patterns, and botnet detections, to support faster incident response.
 - Supported vulnerability assessment and security testing by using Kali Linux tools to identify potential weaknesses and improve the organization's security posture.
-

CERTIFICATIONS & TRAINING

- IBM Cybersecurity Fundamentals
 - Alibaba Cloud ACA Big Data Certification
 - Fortinet Certified Associate in Cybersecurity (FCA)
 - Fortinet Certified Network Security Associate (NSE 3)
 - EC-Council Learning – Cybersecurity for Businesses: The Fundamental Edition
 - EC-Council Learning – SQL Injection Attacks
 - EC-Council Learning – Android Bug Bounty Hunting: Hunt Like a Rat
 - EC-Council Learning – Selenium Automation Testing for Beginners
 - Google Manage Security Risk
 - Salesforce Mountaineer Trailhead Badge (61 badges; 33,475 points)
 - Security and Performance
 - Object Relationships
-

RELEVANT EXPERIENCES

Vulnerability Assessment – ISDAO.org

Feb 2026 – Feb 2026

Vulnerability Analyst

- Conducted vulnerability testing for the ISDAO.org website to help identify potential security weaknesses and improve website protection.
- Performed basic security checks on website functionality, input fields, and possible exposure points
- Documented findings and provided recommendations to support safer website operations.

LIFEGIVER CHURCH OF FAITH

Feb 2026 - Present

Technical Committee Member

- Assist in overseeing technical aspects of church services, including sound systems, lighting, and multimedia presentations.
- Provide support for technical troubleshooting and setup of church events, enhancing overall experience for attendees.

Caffeine AI Hackathon

Oct 2025 – Oct 2025

Participant

- Collaborated in a hackathon environment to develop an AI-focused solution, apply problem-solving skills, and present ideas under time constraints.
-

PROJECTS

Information System with IoT-Enabled Incident Reporting and E-Services for Barangay Gumaoc East

Full-Stack Developer

Nov 2025 – Present

- Developed and maintained a web-based barangay information system with IoT-enabled incident reporting and digital e-services.
- Implemented system features for resident service requests, incident reporting, records management, and other barangay processes to reduce manual workflows.
- Built and integrated front-end and back-end functionality based on system requirements and user needs.
- Improved system usability and process efficiency by enhancing application features, user workflows, and data handling.
- Identified and resolved application issues, tested implemented features, and supported system improvements before deployment.

Web-Based Inventory Management and Point of Sales System for HandyHub Hardware

Full-Stack Developer

Nov 2024 – Mar 2025

- Developed a web-based inventory management and point-of-sales system to improve product tracking, stock monitoring, sales processing, and report generation.
- Implemented core features for managing inventory, processing sales transactions, monitoring low-stock products, and generating inventory and sales reports.
- Helped reduce manual inventory processes and improve operational efficiency for hardware business transactions.

JobPhish: Cybersecurity Awareness & Phishing Simulation Platform

Front-End Developer

Nov 2023 – Dec 2023

- Performed quality assurance testing for a web-based crime recording system designed to organize incident records and improve case tracking.
- Tested features for record management, report generation, information retrieval, and monitoring of documented incidents.
- Reported system issues and supported improvements to usability, accuracy, and reliability.

Bmail: Realistic Email Security Training Platform

Front-End Developer

Nov 2023 – Dec 2023

- Built a Gmail-like phishing training interface that helps users identify phishing indicators, report suspicious emails, and practice safe email decision-making.
- Created interactive email scenarios to improve user awareness of suspicious senders, malicious links, and social engineering tactics.

PROFESSIONAL AFFILIATIONS

- **ISC² Candidate**
- **Member, Philippine Institute of Cybersecurity Professionals**
